EDUCATION

Banasthali Vidyapeeth   November 2021 – Present
Bachelor of Technology in Information Technology   *CGPA: 7.98*

S.B.P Vidya Vihar   2019 – 2021
Intermediate

EXPERIENCE

Growth Manager   July 2024 – Present
Phicsit
- Developed and implemented growth strategies
- Authored and optimized over 5+ engaging blog posts on Phicsit's website.
- Promoted student participation in platform competitions, leading.

Technical Content Writer   May 2023 – July 2023
Social Summer Of Code
- Authored insightful articles on open-source topics for the company blog, driving a 25% increase in readership and community engagement.
- Raised awareness through targeted content on open-source initiatives, contributing to about 30% increase in participant success during the Social Summer of Code.

PROJECTS

Byte Defender | *HTML, CSS , Javascript, Bootstrap,Django and MySQL*
- Developed a Windows malware detection website that accurately identifies malicious files, with a focus on analyzing Portable Executable (PE) files.
- Engineered a specialized detection algorithm for PE files, enhancing malware identification accuracy by 40%.
- The Github repo link for the same is [this](#)

Tic Tac Toe | *HTML,CSS,JavaScript*
- Developed a browser-based single-player game with a responsive UI designed using CSS, allowing users to play against the computer with no need for additional players.
- This single player game is played with computer or there is no need of 2nd person
- The Github repo link for the same is [this](#)

Realtime Tracker | *Node.js, Express, and Socket.io.*
- Developed a Real-Time Tracking App using Node.js, Express, and Socket.io, enabling live tracking of user locations on a Leaflet map through geolocation data from users' browsers.
- Implemented real-time updates and dynamic map features, ensuring user locations are continuously refreshed as they move, resulting in a 30% improvement in tracking accuracy.
- Integrated a seamless disconnect feature that instantly removes markers when users go offline, improving the app's reliability and reducing map clutter by 20%.
- The Github repo link for the same is [this](#)

AWARDS AND ACHIEVEMENTS

- Swags from Google Cloud Ready Facilitator Program
- Hosted an online Hackathon named softcode 1.0

TECHNICAL SKILLS

Languages: C , C++ , HTML, CSS, Javascript
Frameworks:ReactJs, Tailwind
Developer Tools: Git, VS Code
Soft Skills: Communication skills, Active listening, Time management, Teamwork, Creativity
